

# Internal Roller Components

Offer a cost effective, complete solution, with interchangeable components to reduce stock-holding. Designed and developed in conjunction with our specialist customers, for the Australian blind industry.

## Design Smarts

- 1:1 and 1:1.5 open and closed control mechanisms suitable for 38 and 43mm diameter tubes.
- The design smarts behind the middle joint system enables a driven or non driven solution with the use of one component
- Double brackets for all applications along with neat single and double bracket covers.
- Oval and flat bottom rail options
- Extensive operating chain range, in multi lengths colour coded to match the hardware, stainless steel & metal
- Aluminium tubes sizes from 38 to a heavy duty 43mm, taped or un-taped.

## Colour

All components available in white, black, grey and cream

## Safety

Child safety has not been overlooked with a comprehensive range of chain anchors for face fit and reveal installations

## Distribution

All hardware is stocked locally and supplied via a network of distribution centres in NSW, Victoria, Queensland, WA & New Zealand.
